The information within the manual was designed to help prepare you for the Louisiana State Police Cadet assessment. Please review the material within to familiarize yourself with the topics to be covered on the assessment.

Part 1: The Cadet Assessment at a Glance

The assessment is one of the first steps in a rigorous process to select applicants for the Louisiana State Police Cadet Position. It should not be viewed as an achievement test but rather as a way to measure the strengths, weaknesses, and trainability of those who take it. As a result, there will not always be a right or wrong answer to every question on the assessment.

You will have two (2) hours to complete the assessment. There will be twenty (20) questions from each content area, totaling 100 questions. The material in the manual covers the five sections on the assessment including:

Comprehending Oral Information
Visual Memory
Arithmetic Skills
Grammar Skills
Situational Judgment

Part 2: Assessment Strategies

Before the day of the assessment to reduce unnecessary stress:

Complete and submit any required documents before the day of the assessment.

Review any materials received from the LSP and confirm that you have submitted all of the necessary paperwork.

Familiarize yourself with the location in which you will take the assessment. Confirm which building and room number the assessment will be given, as well as the designated parking areas.

Be well rested. Get a good night's sleep before the assessment.

Bring the appropriate documents and materials to the assessment location. Make sure your documents are current and double-check the requirements the night before the assessment.

Be on time. Know what time the assessment starts and what time you are required to arrive. Check local weather the night before to ensure enough travel time is allowed.

Assessment-taking Strategies:

Evaluate your attitude about the exam. Stay relaxed and positive. Take slow, deep breaths if you find yourself getting anxious.

Understand the instructions before you start. Ask questions if you need clarification or if you do not have the necessary materials.

Read all of the directions before you start. Do this for each section, as the directions could change. Underline details you find important, and ask questions if you do not understand.

Read each question carefully. Choose what you feel is the best answer. There may or may not be a correct answer. If in doubt, narrow the choices down and eliminate those you feel are incorrect.

Don't get stuck on a question. Answer the question you find easy, first. Postpone the harder questions, or make a guess, mark the question, and return to it if you have time. You have two hours to complete the assessment. Budget your time wisely.

Don't over-analyze the question. These questions aren't intended to be "tricky." If a word in a question has multiple meanings, use the one most widely accepted.

Double-check your answer sheet. Try to answer all of the questions, and go back through once you are finished to make sure you have not missed a question by mistake. Remember, your first answer to the question is often the right answer, so try to review the answer sheet for mistakes instead of second guessing yourself.

Part 3: Practice Questions

You can expect similar kinds of questions presented in this preparation manual in the actual exam. The following sections are designed to provide you practice. These questions are in a multiple choice. Your task will be to read the questions carefully and select the most appropriate answer choice. In order to gain adequate benefit from these practice questions, read the instructions carefully and answer them as if you are taking the actual exam.

Section I: Comprehending Oral Information

This section is designed to assess your ability to recall information that is provided to you orally. A scenario will be read aloud to you and followed by questions pertaining to the scenario. You should try to remember as much information as possible from the scenario, paying close attention to details.

For practice, read the scenario, give yourself a few minutes, and then answer the questions without referring back to the written passage. The following is an example of the type of information that may be presented:

A police officer arrives at the scene of a traffic accident and needs to take detailed notes of the accident. The police officer begins by asking John (victim #1) and Amy (victim #2) to describe the events of the accident. John indicates that his car crashed into the Amy's car going 45 miles an hour. The accident happened in front of a local grocery store. There were 4 witnesses that confirmed that John crashed into Amy's car. John was on his way home from work, while Amy was on her way to the gym. Three news stations were on the scene to report about the accident. The reporters arrived by car and not by a news helicopter.

Choose what you feel to be the single best answer for each question. The answers are provided at the end of the section.

1. Where did the accident occur?

- a. Grocery store
- b. Hardware store
- c. Pharmacy
- d. Gas station
